

# Food Packaging for the Future

The excellent gas barrier and aroma/flavor preserving properties of Nylon-MXD6 hold up in the most treacherous and humid environments, providing a new level of safety and performance for food packaging.

Now with FDA approval, its pinhole resistance, transparency and environmental compatibility make Nylon-MXD6 perfect for almost any food and beverage application. From multi-functional packaging to molded or stretched containers or films, Nylon-MXD6 delivers exceptional barrier

performance especially in cold, wet environments like food lockers and refrigerators.

Its superior thermal stability allows stable processing while its excellent adhesion properties allow Nylon-MXD6 to combine with other packaging materials. If you desire these capabilities, please visit our Internet site for more specifics.
